Tuš kabine

Dinamika tuš kabine

Za tuš kabino se odločamo zaradi hitrega tempa življenja, pomanjkanja prostora, manjše porabe vode in manjšega odtisa na okolje. Tuš kabine Kolpasan nam pomagajo kopalnico prostorsko čimbolje izkoristiti, optično povečati, pa tudi vsakodnevno lažje čistiti.

Z izbiro pravega modela in stekla vizualno razpre še tako majhen prostor, da se ne počutimo utesnjeno, ampak varno in sproščeno.

Dynamics of shower enclosure

We opt for a shower enclosure due to the fast pace of life, lack of space, lower water consumption and lower footprint on the environment. Kolpasan shower enclosures help us make the most of the bathroom, optically enlarge it, and facilitate daily cleaning. By choosing the right model and glass, even the tiniest of spaces will be visually enlarged so we won't feel cramped, but safe and relaxed.

Dinamika tuš kabine

Za tuš kabinu se odločujemo zbog brzog tempa života, manjka prostora, manje potrošnje vode i manjeg utjecaja na okoliš. Tuš kabine Kolpasan pomažu nam da što bolje iskoristimo svoju kupaonice, optički je povećamo i olakšamo svakodnevno čišćenje.

Odabir pravog modela i stakla vizualno proširuje čak i mali prostor, kako se ne bi osjećali skučeno, već sigurno i opušteno.

Dinamika tuš kabine

Za tuš-kabinu se odločujemo zbog brzog tempa života, nedovoljno prostora, manje potrošnje vode i manjeg uticaja na okolinu. Tuš-kabine Kolpasan nam pomažu da što bolje iskoristimo svoje kupatilo, da ga optički povećamo i olakšamo svakodnevno čišćenje.

Odabir pravog modela i stakla vizuelno proširuje čak i mali prostor, da se ne osećamo skučeno, već sigurno i opušteno.

Faktorji vodotesnosti tuš kabin po modelih

Factors affecting water tightness of shower cabins according to models

Čimbenici vodonepropusnosti tuš kabina po modelima

Faktori zaptivanja tuš kabina po modelima

Kljub tesnilom na tuš kabini voda še vedno izteka. Je to normalno?
Despite the sealants on my shower enclosure, the water still leaks. Is this normal?
Unatoč brtvilima na tuš kabini voda još uvijek otječe. Je li normalno?
Bez obzira na zaptivke na tuš kabini voda i dalje curi. Da li je to normalno?

Tuš kabine ponujajo različne stopnje vodotesnosti, vendar popolne zaščite proti uhajanju vode ni mogoče zagotoviti.

Shower enclosures come in various levels of water resistance. However, nobody can ensure total protection against water leakage.

Tuš kabine nude različite stupnjeve brtvljenja, ali potpunu zaščito od otjecanja vode nije moguće osigurati.

Tuš kabine nude različite nivoe zaptivanja, ali se potpuna zaštita od curenja vode ne može obezbediti.

F 1

Faktor 1

Modeli tuš kabin v izvedbi z aluminijastim okvirjem

Ti modeli omogočajo posebno dobre vodotesne lastnosti. Priporočajo se za prhanja z večjo frekvenco in uporabo masažnih prh z veliko količino vode.

Faktor 1

Shower cabin models featuring an aluminium frame

These models feature particularly good water tightness characteristics and are recommended for more frequent showers and use of massage showers consuming large quantities of water.

Čimbenik 1

Modeli tuš kabina u izvedbi s aluminijemskim okvirom

Ti modeli omogućuju posebno dobra vodonepropusna svojstva. Preporučuju se za tuširanja s većom frekvencijom i uporabom masažnih tuševa s velikom količinom vode.

Faktor 1

Modeli tuš kabina u izvedbi sa aluminijumskim okvirom

Ti modeli omogućavaju posebno dobre osobine u pogledu zaptivanja. Preporučuju se za tuširanja sa većom frekvencijom i korišćenje masažnih tuševa sa velikom količinom vode.

Kabine s spodnjim okvirjem
Cabins with the bottom frame
Kabine s donjim okvirom
Kabine sa donjim okvirom

F 1

F 2

Faktor 2

Modeli tuš kabin z dodatnim zaščitnim profilom

Dodatno nameščen profil izboljšuje stopnjo zaščite vodotesnosti, vendar je ne more 100% zagotoviti.

Faktor 2

Shower cabin models with an additional protection profile

Additionally installed profile improves the water tightness protection level, but it cannot guarantee it 100%.

Čimbenik 2

Modeli tuš kabina s dodatnim zaštitnim profilom

Dodatno postavljen profil poboljšava stupanj zaštite vodonepropusnosti, ali ju ne može 100% osigurati.

Faktor 2

Modeli tuš kabina sa dodatnim zaštitnim profilom

Dodatno montiran profil poboljšava stepen zaštite u pogledu zaptivanja, ali ga ne može garantovati 100%.

Dodatni zaščitni profil
Additional protection profiles
Dodatni zaštitni profil
Dodatni zaštitni profil

F 2

F 3

Faktor 3

Modeli tuš kabin v izvedbi brez aluminijastega okvirja

Imajo zadovoljivo stopnjo zaščite vodotesnosti. Zaradi manjkajočega spodnjega okvirja, ima voda možnost lažjega iztekanja. Kljub temu so ti modeli kabin elegantni, ekskluzivni in omogočajo lažje čiščenje.

Faktor 3

Shower cabin models without an aluminium frame

They provide a satisfactory water tightness protection level. Since the bottom frame is missing, water can more easily leak out. Nevertheless, these cabin models are elegant, exclusive and are easier to clean.

Čimbenik 3

Modeli tuš kabina u izvedbi bez aluminijemskog okvira

Imaju zadovoljavajući stupanj zaštite u smislu vodonepropusnosti. Zbog manjkajućega donjeg okvira voda ima mogućnost lakšega istjecanja. Unatoč tomu ti su modeli kabina elegantni, ekskluzivni i omogućuju lakše čišćenje.

Faktor 3

Modeli tuš kabina u izvedbi bez aluminijumskog okvira

Imaju zadovoljavajući stepen zaštite u pogledu zaptivanja. Zbog nepostojećeg donjeg okvira, voda ima mogućnost lakšeg oticanja. Bez obzira na to, ti modeli kabina su elegantni, ekskluzivni i omogućavaju lakše čišćenje.

Kabine bez okvirja
Cabins without a frame
Dodatni zaštitni profil
Kabine bez okvira

F 3

Design tuš zaslonov odreja stopnjo vodotesnosti. Osnovno pravilo je: čim večji in višji je spodnji profil, toliko je višja stopnja zaščite.

The design of the shower screens determines the water tightness. The basic rule: the larger and taller the middle profile, the higher the protection level.

Dizajni tuš zaslona određuju stupanj vodonepropusnosti. Osnovno je pravilo: što je veći i viši donji profil, toliko je viši stupanj zaštite.

Dizajn tuš paravana određuje stepen zaptivanja. Osnovno pravilo je: što je viši i veći donji profil, veći je i stepen zaštite.

Pogosta vprašanja - masažne in tuš kabine

FAQ - Massage and Shower Enclosures

Učestala pitanja - masažne i tuš kabine

Česta pitanja - masažne i tuš kabine

Katere prednosti prinaša zaščita stekel Clean Coat pri tuš kabinah?

What are the advantages of Clean Coat-protected glass for shower enclosures?

Koje prednosti donosi zaštita stakal Clean Coat a kod tuš kabina?

Koje prednosti donosi zaštita stakala Clean Coat kod tuš kabina?

kolpa Clean Coat

Prednosti zaščite stekel tuš kabin:

- **estetske:** čist in svetleč izgled, ki traja dlje časa. Zaradi odpornosti proti umazaniji, madežem in potemnenju, se podaljša prvotni videz
- **funkcionalne:** omogoča zelo preprosto čiščenje
- **higijske:** omogoča hitrejše splakanje, ki odstrani umazanijo, sol in bakterije in za sabo ne pušča usedlin in ostankov. Če je steklena površina dlje časa izpostavljena vodi, olajša odstranitev usedle umazanije z večkratnim umivanjem.
- **ekološke:** manjša uporaba bolj agresivnih čistil

Advantages of shower enclosure glass-protection:

- **Aesthetics:** clean and shiny appearance that lasts longer; the resistance to dirt, stains and dark blotches prolongs its original appearance.
- **Functionality:** extremely easy to clean
- **Hygienic aspect:** enables faster rinsing, to remove dirt, salt and bacteria, and leaves no deposits and remains. If the glass is exposed to water for a longer period of time, it facilitates removal of deposited dirt through multiple washing.
- **Ecological aspect:** reduces use of more aggressive cleaning agents.

Prednosti zaštite stakala tuš kabina:

- **estetske:** čist i svjetleći izgled koji traje duže vremena. Zbog otpornosti na nečistoće, mrlje i tamnjenje produžuje se prvobitni izgled
- **funkcionalne:** omogućava vrlo jednostavno čišćenje
- **higijenske:** omogućava brže ispiranje koje uklanja nečistoće, sol i bakterije i za sobom ne ostavlja talog i ostatke. Ako je staklena površina duže vrijeme izložena vodi, olakšava uklanjanje nataložene nečistoće koja je nastala višekratnom uporabom.
- **ekološke:** manja potrošnja agresivnijih sredstava za čišćenje

Prednosti zaštite stakala tuš kabina:

- **estetske:** čist i sjajan izgled koji traje duže vreme. Zbog otpornosti na prljavštinu, fleke i potamnjivanje prvobitni izgled duže traje
- **funkcionalne:** omogućava vrlo jednostavno čišćenje
- **higijenske:** omogućava brže ispiranje koje uklanja prljavštinu, so i bakterije i iza sebe ne ostavlja naslage i ostatke. Ukoliko je staklena površina duže vreme izložena vodi, olakšava uklanjanje naslaga prljavština višekratnim pranjem
- **ekološke:** manja potrošnja agresivnijih sredstava za čišćenje

Dodatni profili pri tuš kabinah

Additional profiles for shower enclosures

Dodatni profili za tuš kabine

Dodatni profili kod tuš kabina

Imam nestandardne dimenzije kopalnice, kaj pa zdaj?
The dimensions of my bathroom are non-standard. What now?
Imam nestandardne dimenzije kupaonice, što sada?
Imam nestandardne dimenzije kupatila, šta da radim?

Za primere, ko prostor na razpolago za vgradnjo tuš kabin ni standardnih dimenzij, smo razvili dodatne kompenzacijske profile, s katerimi lahko prilagodimo standardne izdelke na željeno mero. Na naslednjih straneh lahko preverite, kateri izdelki ponujajo to možnost.

For the situations where the space available for the installation of a shower cabin/enclosure is of non-standard size, we have designed additional compensation studs allowing adjusting standard products to the desired dimensions. Check the following pages for products offering this option.

Za slučajeve kada prostor na raspolaganje za ugradnju tuš kabina nije standardnih dimenzija razvili smo dodatne kompenzacijske profile s kojima možemo prilagoditi standardne proizvode prema željenoj mjeri. Na sljedećim stranicama možete provjeriti proizvodi pružaju tu mogućnost.

Za slučajeve, kad prostor za ugradnju tuš kabina nije standardnih dimenzija, razvili smo dodatne kompenzacione profile pomoću kojih možemo da prilagodimo standardne proizvode na željenu meru. Na sledećim stranicama možete da proverite koji proizvodi pružaju tu mogućnost.
